

A Continuous Air, Water and Thermal Solution Using Hunter Xci Foil (Class A) and SIGA Wigluv Tape

Hunter Panels Xci Polyiso and SIGA Wigluv

Products

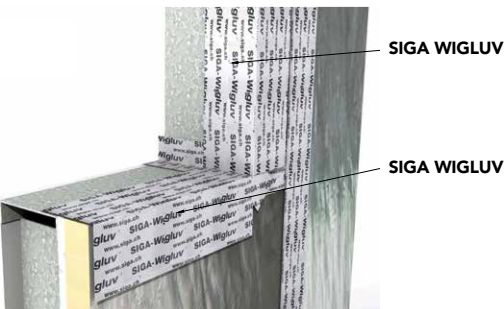

Hunter Xci Foil (Class A)— The Continuous Insulation

- Can be installed directly on steel studs in a variety of wall assemblies without the need for gypsum sheathing
- Superior fire performance, durability and dimensional stability
- Designed for use in continuous insulation to assist in meeting ASHRAE 90.1, IECC, IBC and IRC standards
- Hundreds of NFPA 285 compliant assembly options

SIGA Wigluv— High Performance Sealing Tape

- Highly adhesive in cold and warm temperatures
- Highly flexible allowing for building and panel expansion and contraction
- Driving rainproof ensuring an air and water tight assembly
- Acrylic tape – non butyl, zero VOC's
- Available in 2.4, 4, 6 and 9 inch widths
- Can also be used as a window and penetration flashing

System/Application

Hunter Xci Foil (Class A) and SIGA Wigluv offer a tested 3 in 1 thermal, air and weather barrier solution

- Independently tested air and weathertight assembly meeting ASTM E331-00 and ASTM E2357-11 tests for air and water intrusion
- Increased overall wall system performance
- Saves labor and simplifies application

Apply SIGA Wigluv at all insulation seams and flashing areas to achieve a barrier solution

- SIGA Wigluv available in multiple widths for seam and flashing requirements
